DATED: January 18, 2002

Dear Sir:

This petition is being filed along with the Response to Notice to File Missing Parts. The Notice to File Missing Parts was dated December 31, 2001, listing that the statutory basic filing fee was missing, an additional claims fee was missing, and the oath and declaration was unsigned.

This petition is made to request acceptance of the declaration which has been signed by only one of the two joint inventors. The nonsigning inventor had been presented with a copy of the specification and drawings of the patent application along with an assignment form and declaration form, and was requested to sign and return the assignment and declaration forms. The nonsigning inventor returned these papers to our office unsigned, as evidenced by his e mail to me dated November 20, 2001, and has refused to execute the declaration. Mr. Delaney has signed the declaration on behalf of himself and Mr. DeKoning, and the declaration is enclosed herewith.

The last known address of the nonsigning inventor, Rodney A. DeKoning, is 6876 SW Stone Gap, Augusta, Kansas, 67070.

The Commissioner is hereby authorized to charge the Petition fee in the amount of **\$130.00** to Deposit Account No. 12-2252. A duplicate copy of this *Petition* is enclosed for accounting purposes. The Commissioner is hereby authorized to grant any needed extension of time and to charge any additional fees which may be required for this *Petition*, or credit any overpayment to Deposit Account No. 12-2252.

Respectfully submitted,

By:

Walter J. Malinowski

Subject: RE: Papers requiring signature for filing a patent application for LSI Logic docket no. 01-019
 Mr. Walter J Malinowski,

For the reasons discussed below and in not being offered a reasonable alternative, I refuse to sign the papers required to file the patent application, at the United States Patent and Trademark Office, for LSI Logic docket no. 01-019, entitled "Method for the Acceleration and Simplification of File System Logging Techniques using Storage Device Snapshots".

1. I have been incredibly flexible in completing LSI IP (10 patents since I left) including one that dragged into late March of this year. I have done so with a significant amount of good faith on my part and totally without compensation for the dozens of hours that I have spent reviewing these prior patent cases and working with LSI lawyers. (Not to mention the expense of reviewing issues with my personal attorneys.)
2. I will continue to protect LSI Intellectual Property as I have diligently done since I left, but I am put in an increasing quandry due to LSI's negligence in finishing these matters in a timely fashion. This quandry is that any embellishments to the patent from my original input is not a result of my input. However, should I review this (and any other patents that may have been embellished since my involvement) I will be exposed to LSI IP that I do not wish to be party to. While I do not work directly in the specific area (at least as I vaguely remember it) of this particular patent for my current employer, I think you can understand the difficult position this puts me in from an ongoing IP standpoint.

I will return the documents you sent me for this patent - unreviewed via the Fed Ex package you supplied.

I will say that I regret any inconvenience that this may cause you, but have not determined an option that is acceptable.

Regards,

Rod DeKoning

Subject: Papers requiring signature for filing a patent application for LSI Logic docket no. 01-019

Dear Mr. Rodney DeKoning:

You are listed as one of two co-inventors for the patent application of LSI Logic docket no. 01-019.

It is my understanding that you do not intend to sign the papers, including the declaration and assignment, required for filing the patent application with the Patent Office.

Would you please confirm this? If you confirm this, would you put in, as a minimum, a statement such as "I refuse to sign the papers required to file the patent application, at the United States Patent and Trademark Office, for LSI Logic docket no. 01-019, entitled "Method for the Acceleration and Simplification of File System Logging Techniques using Storage Device Snapshots", of which I and William Delaney are the two inventors".

Thank you,

Walter Malinowski

PATENT & TRADEMARK OFFICE

Dear Mr. DeKoning:

I would like to have your review of the patent application. I would also hope to have your signature on the appropriate documents.

It was actually Bill Delaney, according to my understanding, who forwarded the patent application and papers for signing to you.

As far as your comment "This quandry is that any embellishments to the patent from my original input is not a result of my input." is not the point as far as inventorship. For inventorship, your inventive efforts need to have been expressed in one of the claims.

Two citations from the Manual of Patent Examining Procedure are provided immediately below.

"As long as the inventor maintains intellectual domination over making the invention, ideas, suggestions, and materials may be adopted from others."

"Each joint inventor must generally contribute to the conception of the invention. A coinventor need not make a contribution to every claim of a patent. A contribution to one claim is enough."

Again, I encourage your review of the patent application.

Thank you,

Walter Malinowski
Suiter & Associates
